

Teacher dashboard, quick start

Everything you can do from the wobble teacher dashboard once your class has joined with a class code.

- Create a class and hand out the class code and usernames. Students join themselves in under a minute.
- Eyes up: one tap locks every student screen with a look up message.
- Class timer: start a shared countdown for silent reading, visible on every device.
- Hand up: students raise a hand from inside wobble without calling out.
- Share books: push a scanned book or chapter to the class, a group or one student.
- Required reading: assign a text with a due date, waiting on the student's home screen.
- Worksheets: generate comprehension questions, vocabulary and spelling lists from any scanned chapter.
- Reading hours: minutes read, words covered and books finished, per student, per week.
