

Wobble in the classroom: quick start

what you need

- Any device with a modern browser and a camera (Chromebook, iPad, phone, laptop).
- No app store, no install, no login.
- An internet connection (used for character voices and book lookups).

first lesson plan

- Open wobble-buddy-assist.lovable.app in the class browser.
- Walk through the three modes together: Scan, Books, Photo.
- Let pupils set their own font size, line spacing, and tint. This is the most important step.
- Demo Tap-a-word, the Reading ruler, and Who's who. Three short 30-second demos.
- Set a 5-minute reading task and let pupils choose the mode that suits them.

classroom routines

- Always come back to the same browser on the same device. Settings live there.
- Avoid private/incognito tabs for daily use.
- Encourage pupils to save their tint and font choices once they find a combination that feels calm.

accessibility defaults we recommend

- OpenDyslexic font, size 18 to 22.
- Line spacing 1.6 to 1.8.
- Peach or mint tint for most pupils. Adjust to taste.
- Reading ruler ON for chapter books and comprehension.
